Summary

I am a Software Engineer who has spent the last seven years working in Business and Operations. Well versed in full-stack javascript, and React. I am known for my strong work ethic in both team and individual settings. I continue to expand my abilities as a full-stack developer, and push myself by building user facing projects.

Skills

HTML5 | CSS3 | JavaScript | React | React Native | Node | Express | MongoDb | Mongoose | Java | Python | Jquery | Firebase | Amazon AWS | Django | SQL | Git & Version Control| API's | Eclipse | VSCode | Wordpress |

Projects

In Progress:

Steady Mobile Dating App (https://github.com/Code-With-Jon/Steady-Site)

- Using React Native, Redux, and Firebase to build a social dating app
- Incorporating matching algorithm, geolocation, and user inputs

completed:

Steady Mobile Dating App Website (https://github.com/Code-With-Jon/Steady-Site)

- Used MERN stack to build a supporting resource for Steady mobile app
- Implemented virtual assistant chat, Lottie animations, SMTP request to send email, and compatibility mini game

MeetUp App (https://github.com/Code-With-Jon/Convene-2)

- CRUD application using Python, Django, HTML and CSS to build a meet up app similar to meetup.com
- Implemented AWS for storing photos on events

MineSweeper Clone (https://github.com/Code-With-Jon/MineSweeper)

- Used Vanilla JS, Jquery, HTML, and CSS to build a clone of the classic MineSweeper game
- Implemented Local Storage database to store previous durations of gameplay

AirBnB Clone (https://github.com/Code-With-Jon/AirB-LetB)

- CRUD application using EJS, Express, Mongo, Mongoose, HTML and CSS to build a clone of the base functionality of AirBnB.
- Implemented OAuth, User and Home Schema's, and incorporated both global and private views.

Professional Experience
